

BWU-100A Firmware Update

Download the BWU-100A firmware updater to your hard disk, unzip the file, and then perform the procedure below.

Important Note:

- When using Windows Vista or Windows XP, **log on to Windows as the computer administrator or as a user with administrator access privileges.**

1 Connect the BWU-100A to your computer. Confirm that the drive is detected correctly by your computer.

2 If a disc is loaded in the drive, remove it.

3 Double-click the executable file "**BWU100A_10f.exe**"

4 Close all other programs and Click [Yes] to continue.

5

Please read the statement and select [Yes] to continue .

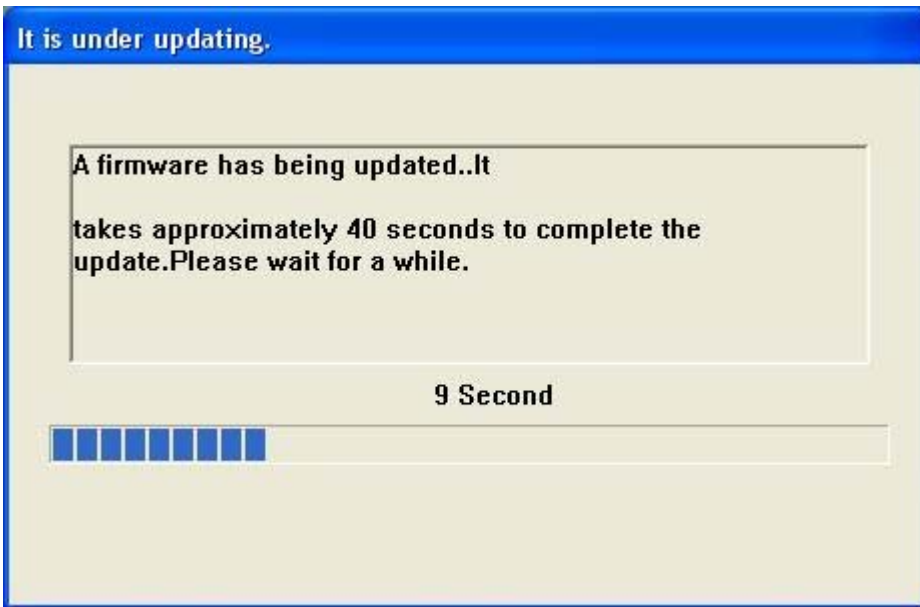

6 Please confirm if you want to update by clicking "Start updating"

Note:

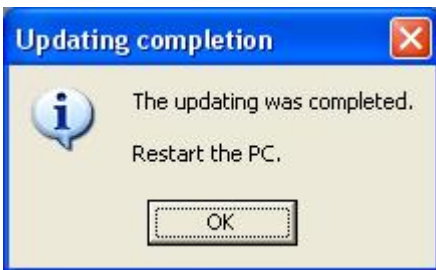

Do not turn off the power of the drive or your computer during the firmware update. Further, do not handle the drive or interface cable, or touch your keyboard as it may cause the update to fail or make the drive unusable.

7 The drive indicator becomes blue and the update begins.

8

The update is now completed, click [OK] to restart your computer.
