* contacts only

PC System Requirements

Operating System – Microsoft Windows 98, Windows NT v4.0 or later, 2000, XP

Microsoft Outlook – 97, 98, 2000, 2002

Note: vSender does not work with Outlook Express

Installation Instructions

To install vSender:

1. Find and run the program **Nokia_vSenderInstall.exe** using either Run (on the Start Menu) or Windows Explorer. Outlook **MUST** not be running during installation or vSender will not install correctly.
2. Choose a language to be used during installation and use of vSender.
3. Follow the directions and accept the end user software agreement.
4. Choose where vSender will be installed. If you want to accept the recommended location click on the Next button.
5. Click Finish to exit the installation.

vSender is now ready to use. You can now run Outlook and check to see that vSender has installed correctly. A new item (Send to phone...) has been added to the Tools menu. A new button has also been added to the toolbar.

vSender button

How to use vSender

To send one or more contacts or calendar items to your phone:

1. Select a view in Outlook where you can see either your contacts list or calendar.
2. Select an item using your mouse. Hold down the Ctrl key to select multiple items.
3. Select Tools, Send to phone... or press the vSender button on the toolbar.

4. Type the email address of the handset you want to send the items to in the are to the right of the To... button. Or you can choose a previously saved address by pressing the To... button. Depending on your carrier, the email address should be in the format of:

AT&T Wireless	yourphonenumber@mobile.att.net
Cingular	yourphonenumber@mobile.mycingular.com
Suncom	yourphonenumber@tms.suncom.com
Verizon	yourphonenumber@vtext.com

For example, if your carrier is Cingular and your phone number is 800-555-1212, you would type 8005551212@mobile.mycingular.com into the field.

You can also automatically add your carrier's email suffix by pressing the Add... button (currently only AT&T and Cingular supported) after you type in your phone number.

5. Press OK to send the contact(s) or calendar item(s)
6. Your phone will beep shortly as you receive messages containing the contact(s) or calendar item(s). You can then view, save, or discard the contact(s) or calendar item(s).

You can check the Save last address box to save the address until you use vSender again.

Limitations using vSender with AT&T Wireless

AT&T Wireless uses e-mail filters to prevent your phone from being 'spammed' with e-mails. This may limit the number of contacts or calendar items that can be sent at one time to your phone.

Select and send no more than 5 contacts or 3 calendar items at one time. Wait at least 5 minutes before sending additional items. Similarly, if you are sending a contact or calendar item to multiple phones, send the contact or calendar item to no more than 5 recipients at one time. The contact or calendar item can be sent to additional recipients at 5 minute intervals.

Incompatible E-mail Service Providers

Some free e-mail providers attach a signature to all e-mails that are sent using their service. The signature is incompatible with the smart message format used to send contacts and calendar items. Any contacts or calendar items sent through these services will not be recognized by the phone.

Corporate e-mail servers may also attach signatures, like confidentiality notices, to outgoing e-mails. This is also incompatible with smart messages.

E-mail signatures set up in Outlook are compatible with vSender and will not interfere with messaging.

Uninstallation Instructions

You can uninstall vSender by going to the Windows Control Panel, then double-clicking the Add or Remove Programs icon. Find and select the Nokia vSender Outlook Extension, then press the Change/Remove button and follow the instructions.

Problems

Please report any problems in installing or using vSender to: vSender.Support@nokia.com

Updates

If you would like to be notified whenever there is an update available for vSender, please send an e-mail to: vSender.Support@nokia.com
